e-Learning Language Course (eLLC)

The foreign language education within this course is a complete system. You can offer to your students the new resource and easily follow their educational progress.

e-Learning Language Course (abbr. eLLC, Foreign Language Education) offers a broad perspective. It's not only the software which enables you to follow your students, but a huge educational resource consisting of 180 different subjects in 19 languages.

Since 2005 learning of a foreign language with a variety of software developed by Mir Eğitim ve Yazılım takes you one step further with a comprehensive system in front of your competitors.

The new developing technologies integrate appropriate software solutions to all the sectors according to your goals. Being unable to keep pace with this market development will leave you far behind.

The software developing companies who offer Foreign Language Education in the market use general programs to save students' results. Additionally many companies are usually using 3-4 languages and ready Internet programs which offer alternative learning.

We have developed the unique software which doesn't have alternatives. Our aim is to find a solution to all your needs with the help of eLLC system. With eLLC System both you and your students will get positive results.

a) Teaching Methods

Language Education Practice:

- ★ Learning
- ★ Reading
- ★ Listening
- ★ Writing
- ★ Translation

eLLC System uses the world's scientifically proven most successful method of Native Learning.

There have been developed many methods in the world in order to increase the learning speed and give more information to a student. It is important to address the human senses in order to achieve the fullest results of learning. eLLC System appeals to both - eye and the ear senses - in order to get the highest results in education.

From the day we've been born we learn our mother tongue so that all the words and phrases are supported by voice and picture. This activation of both hemispheres of the brain offers more efficient training facilities.

'The system used in 250,000 schools in the United States is now in Turkey!'

This system used in European Union countries and America allow to teach and to learn languages very easy. With this program students follow the way of "Learning, Reading, Listening, Writing, Translation" which can be easily used by everyone who wants to learn languages. The program shows to a student different applications of a word at least 5 times. It helps the student to learn new words subconsciously and without getting bored.

One of the largest opportunities that gives you eLLC System is a variety of educational resources for your students who are able to work outside your educational institution. There are 180 topics and approximately 64700 questions in each language so you will not need any other extra source. Moreover, you will see when your students study the topics.

You will not find classical video lessons in eLLC System. The courses are fully described interactively. Right-wrong answers of the students are stored in the system and can be accessed at any time by any of the teachers.
